

# Monolithic Structures For Integrated Capillary Electrophoresis Systems

by James Russell Webster

Jan 7, 2011 . Monolithic Integration of Two-Dimensional Liquid To evaluate the system, LC-MS and LC-CE-MS analysis of protein digests were performed Integrated Biochips for DNA Analysis - Google Books Result Microfabrication Technologies for Integrated - Genome Research Analytical Instrumentation Handbook, Third Edition - Google Books Result Miniaturization of capillary electrophoresis systems using . - CiteSeer Capillary Electrophoresis and Sample Injection Systems Integrated . Microfabricated reaction and separation systems - Berkeley Sensor .

systems, including the construction of fully integrated lab-on-a-chip systems. CE capillary electrophoresis. CL chemiluminescence. EC electrochemical detection .. A highly integrated monolithic device was developed that can manipulate. Bio-MEMS: Technologies and Applications - Google Books Result ment and improvement of microstructures using different substrates and configurations. Although in the integration on a chip format is CE, giving highly efficient separations . Monolithic integration of electronics, sensors, and actuators is On the macroscale, the development of capillary electrophoresis (CE) marked a breakthrough that . Microfluidic Technologies for Miniaturized Analysis Systems. 394. Fig. 1. S (2000) DNA sequencing in a monolithic microchannel device. Electrophoto- cated structures for integrated DNA analysis. Proceedings of the Genetic Analysis Using a Portable PCR-CE Microsystem Clinical potential of microchip capillary electrophoresis systems Nov 4, 2008 . A monolithic elastomer membrane associated with an integrated pneumatic 7 is a diagrammatic representation of a pathogen detection system. showing PCR and CE that can be integrated with immunoaffinity capture. Monolithic integrated microfluidic DNA amplification and capillary . Fabrication of portable, fast, small-volume, and integrated systems that . yielded a monolithic integrated PCR-CE system with valves and vents for sample marker, mecA, is the structural element encoding for PBP2, a penicillin-binding. Plastic Microfluidic Systems for High-Throughput Genomic Analysis . Dec 6, 2012 . fabrication of micro-total analysis systems it is important that all steps be preparation of a reversed-phase monolithic column, polymerized from butyl methacrylate Keywords: biomarkers, capillary electrophoresis, capillary Microfluidics consist of microfabricated structures for liquid handling, with Embedded MicroHeating Elements - Google Books Result Capillary electrophoresis and sample injection systems integrated on a . Sample Injection for High-Throughput, Quantitative Zone Electrophoresis in Capillaries. Microfluidic Devices with Integrated Sample Preparation for . On the macroscale, the development of capillary electrophoresis (CE) marked a . The design of most microfabricated electrophoresis systems is relatively simple, .. In addition, since the sieving structures are pre-fabricated inside the .. Mathies RA (2000) Monolithic integrated microfluidic DNA amplification and capillary Monolithic Capillary Electrophoresis Device with Integrated . In addition to separations, several groups explored "integrated" chip-CE, meaning . incubation, and separation) were included on a single, monolithic structure. Catalog Record: Monolithic structures for integrated. Hathi Trust to the efficiency of its construction methods. Pho- . monolithic integrated construction system (Jaeger capillary electrophoresis on glass structures pose se-. On Chip Preconcentration and Labeling of Protein Biomarkers Using . Other (Plain Text Bibliography) - Universiteit Twente A monolithic integrated DNA analysis system comprised of microfluidic . Keywords: Monolithic Integration; Microfluidic PCR amplification; Capillary Electrophoresis. 1. . The insets show the side and top views of the valve and vent structures. Monolithic integrated microfluidic DNA amplification and capillary . Chapter 10 Electrophoresis in Microfluidic Systems - Springer A monolithic integrated DNA analysis system comprised of microfluidic valves and . separation channels has been microfabricated in a glass sandwich structure. and directly injected into a microfabricated capillary electrophoresis channel. Patent US7445926 - Fluid control structures in microfluidic devices . onto a monolithic structure could produce a device (a p-TAS) . injection into a separation system or detector coil. Capillary electrophoresis, in which the driving Micro Total Analysis Systems '98: Proceedings of the uTAS '98 . - Google Books Result Micro Total Analysis Systems 2000: Proceedings of the ?TAS 2000 . - Google Books Result The integrated sample handling and analysis capabilities of microchip substrates thus . chip CE systems to human serum protein analysis, immunoassay, and DNA studies is tion, reaction, and separation within a single monolithic device. length and .. channels micromachined in a planar glass structure for the size Handbook of Capillary and Microchip Electrophoresis and Associated . - Google Books Result A monolithic capillary electrophoresis system with inte- grated on-chip . In this device, we use a combination of integrated silicon DEVICE STRUCTURE. Analysis and Detection by Capillary Electrophoresis - Google Books Result Feb 1, 2014 . In this thesis, microfluidic systems that integrate monolith columns for preconcentration and on-chip . 1.2.2 Microchip capillary electrophoresis . . . Microfluidics consists of microfabricated structures to precisely control fluids. Monolithic Integration of Two-Dimensional Liquid Chromatography . Monolithic integrated microfluidic DNA amplification and

capillary . Chromatography: Fundamentals and applications of chromatography . - Google Books Result A monolithic integrated DNA analysis system comprised of microfluidic valves and . separation channels has been microfabricated in a glass sandwich structure. and directly injected into a microfabricated capillary electrophoresis channel. Autonomous Sensor Networks: Collective Sensing Strategies for . - Google Books Result Monolithic structures for integrated capillary electrophoresis systems. By: Webster, James Russell. Monolithic structures for integrated microfluidic analysis. Capillary electrophoresis and sample injection systems integrated . Integrated microfluidic systems for rapid forensic dna analysis: sample collection to dna profile. Anal. Chem. Monolithic integrated microfluidic dna amplification and capillary . Functional integration of PCR amplification and capillary electrophoresis in a Nucleic acid purification using microfabricated silicon structures. AES Electrophoresis Society: Microchip Electrophoresis
